Two people.
Four hours.
Revolutionizing bathroom design.

The KOVA Bath Kit is an innovative delivery system engineered to reduce cost and increase speed to occupancy. It leverages KOVA products and Katerra technology-driven, systems-level thinking to optimize and simplify bathroom design and construction. Rooted in scalable and repeatable manufacturing and construction methodologies, the Bath Kit redefines bathroom construction. Now, a bathroom can be installed and finished by two people in less than one day.

A better, faster way to build a bathroom.

Benefits to Our Clients

Predictability
Precision design and manufacturing results in units that fit every time.

Schedule
One day. Two people. And greater control of the project schedule, increasing the speed to occupancy.

Efficiency
Higher level of organization and streamlined, standard installation methods, waste is eliminated and labor is optimized.

Specialized Trades Reduced
Reduces the need for specialized labor in the field.

Quality
An innovative cradle delivery system is designed to eliminate component damage, resulting in lower defects and quality products every time.

Good, Better, Best
Tailored for a range of product customization options.
